

EXHIBIT 8

New Google Play Console features to optimize publishing

The new Publishing overview page helps you better understand your publishing process while Managed publishing gives you more control over when your app or game updates go live.

NEW FEATURES

Reminder: Starting November 2, 2020, we will retire the old Google Play Console. If you haven't yet, switch to the new version today.

Approval needed for background access to location

If your app uses location in the background, you can now complete the permissions declaration from the App content page (Policy > App content) in Google Play Console.

Watch this video or complete these Play Academy courses to learn more.

COMPLETE PERMISSIONS

Clarifying Google Play billing policy

We clarified the language in our Payments Policy to be more explicit that all developers selling digital goods in their apps are required to use Google Play's billing system.

Understand Google Play's payments policy in the Play Academy.

LEARN MORE

Upcoming Google Play and Android deadlines

- Account hold and restore:
 - November 1, 2020: all apps that use in-app subscriptions must support account hold and restore.
 - November 1, 2020: all subscriptions will be automatically opted into pause and resubscribe unless these features are turned off in Google Play Console.
- TargetSDK - Android 10 (API level 29):
 - November 2, 2020: all app updates must target at least Android 10 (API level 29).
